

Minilessons for Operations with Fractions, Decimals, and Percents: A Yearlong Resource

By Willem Uttenbogaard, Kara IMM, Catherine Twomey Fosnot

Heinemann USA, United States, 2008. Paperback. Book
Condition: New. 267 x 211 mm. Language: English . Brand New Book. Minilessons for Operations with Fractions is a yearlong resource guide in Contexts for Learning Mathematics Investigating Fractions, Decimals, and Percents (4-6) Minilessons for Operations with Fractions, Decimals, and Percents is a resource of approximately 75 minilessons that you can choose from throughout the year. In contrast to investigations, which constitute the heart of the math workshop, the minilesson is more guided and more explicit, designed to be used at the start of math workshop and to last for ten to fifteen minutes. Each day, no matter what other materials you are using, you might choose a minilesson from this resource to help your students develop efficient computation. You can also use minilessons with small groups of students as you differentiate instruction. The minilessons in this guide were designed to be used in grades 5-6. Each minilesson is crafted as a tightly structured series, or string, of computation problems designed to encourage students to look to the numbers first, before they decide on a computation strategy. The strings are likely to generate discussion on certain strategies or big ideas underlying an understanding...
