paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 395 Publisher: China Electric Power Press Pub. Date :2008-03. book for the general higher education Eleventh Five-Year Plan materials. The main contents include: experimental methods. materials science-based experiments. materials testing technology experiments. polymer physics. polymer chemistry experiments. powder engineering experiments. experimental thermal and fluid processes. technology and performance test of cement. glass. and performance test. Experimental technology and performance ceramics. concrete and building materials technology and performance of new experiments and comprehensive and designed experiments and so on. The book according to materials science and engineering features. combined with research and production need to select the experiment. the test project. in conjunction with the preparation of the laboratory building. Book by the scientific experimental method. the correct course of action. coupled with sound recording and data processing and analysis optimization. training students in practical ability. the ability to think and analyze problems. to improve their overall quality and innovation. This book primarily as Undergraduate Materials Science and Engineering Experiment materials are also available for teachers and other professional engineering and technical personnel for reference. More Contents: Introduction Section I first experimental method experimental design and data processing error theory Section III second experimental method of preparing the report the basis of experimental materials science experiments a second experiment the crystal structure analysis of solid-state reaction experiments three clay Determination of ion exchange capacity of sintering experiments Experiment 4 Experiment 5 Determination of thermal conductivity materials. materials linear expansion coefficient of six experimental determination of experimental high-temperature preparation of experimental material seven eight nine experimental determination of magnetic susceptibility of materials optical microscope principle. construction and use of experimental 10 gold Preparation of test specimens with micro-eleven iron-carbon...
